

The core panel is a high density rock wool of 150 Kg/m³, lined on both sides by a 0,7 mm thickness galvanized sheet. Finishing depends on the room and project and it will have a low flame spread PVC decorative film on one side.

This panel is used as lining.

The size for NAVALIBER panels is according to client requirements, being remarkable not only because of the lightness, easy to move and strength but also because of their acoustic and thermal insulation.

Certificates

	Classification	Society	Number
ISOLIBER 25B-15 PANEL	B-15	Bureau Veritas	10588/BO EC
USCG APPROVAL			

Technical Features	25B-15
Linings	0,7 mm
Standard finish	150 micron PVC film
Insulation	Rock wool
Max. Length	2.500 mm
Standard width	600-935 mm
Thickness	25 mm
Weight	16 kg/m ²
Classification	B-15
